

# «Visiting-professors» program

The «Visiting Professors» program started in 2016. The priority objectives of the program are for the visiting professor to broadcast his experience in the field of education, science and clinical practice, conduct practical classes, give lectures, joint scientific research, conduct classes in English.

From 2016 to 2024, over 240 leading foreign scientists from different countries (European, Asian, CIS countries) visited West Kazakhstan Marat Ospanov Medical University under the “Visiting Professors” program. Scientists held open lectures, consultations, seminars, master classes for teachers and students in online and offline formats.

The results of the implementation of the «Visiting Professors» program are: acts of introducing innovative teaching methods into the educational process of the university, joint scientific publications, consultations at the clinical bases of the university, mas-

ter classes on modern methods of diagnosis and treatment, participation in scientific and practical conferences held at the university.
